中学校　英語　解答用紙　（３枚のうち２）

得点	

4（１）

解答例

Most highly successful people follow consistent routines, though these routines are not necessarily tied to a fixed place or activity. The key is making deliberate choices and committing to them. Routine can make your mind feel steady and your mood more consistent. While happiness may require effort and sacrifice, putting actions into a routine can reduce the feeling of difficulty.

中学校　英語　解答用紙　（３枚のうち３）

4（２）

解答例

One of the most important English skills for me as an English teacher is speaking ability. To conduct lessons in English, teachers must communicate fluently with both students and ALTs. This is also a role model for students for effective communication.

To develop this skill, I’ll create more opportunities to use English in daily life. It is now easier than ever to connect with native speakers anytime and anywhere through online platforms. I believe that practical speaking experience is the most effective next step for me. Even when I am too busy to have enough time, I can make use of technology such as generative AI to practice English. Through consistent effort, I aim to continuously develop my English skills.
